## Precautions

**On safety**  
The nameplate indicating operating voltage, power consumption, etc., is located on the rear, be sure that the operating voltage of the system is identical with that of your local power supply.

**Where purchased Operating voltage**  
All countries 100 ~ 240 V AC, 50/60 Hz

Use only the supplied AC power adaptor.  
After operating the system with the AC power adaptor, disconnect the AC power adaptor from the wall outlet if the system is not to be used for an extended period of time. Just switching the POWER switch to STANDBY does not turn the power off.

**On operation**  
Do not open the cabinet. Refer servicing to qualified personnel only.  
Should any solid object or liquid fall into the system, have the system checked by qualified personnel before operating it any further.

Although this system is magnetically shielded, do not leave recorded tapes, watches, personal credit cards, or floppy disks with magnetic coding in front of the system for an extended period of time.

**If the TV picture or monitor display is magnetically distorted**  
Although this system is magnetically shielded, there may be cases that the picture on some TV set/personal computer sets may become magnetically distorted in such a case, turn off the power of the TV set/personal computer set once, and after 15 to 30 minutes turn it on again. For the personal computer set, take the appropriate measures such as data backup before turning it off. When there is serious distortion on the TV set/monitor, please contact your local City/Office, your household waste disposal service or the shop where you purchased the system. This is not a malfunction, but should it bother you, you may turn off the illumination.

**On placement**  
Do not set the speaker in an inclined position.  
Do not leave the system in a location near heat sources, or in a place subject to direct sunlight, excessive dust, moisture, rain or mechanical shock.

**On cleaning**  
Do not use alcohol, benzine, or thinner to clean the cabinet.

If you have any questions or problems concerning your speaker system, please consult your nearest Sony dealer.

**Power Sources**  
**Using on house current**  
(See fig. 1A)

When the AC power adaptor is connected to the system, internal batteries are automatically disconnected.

**Note on the AC power adaptor**  
Use only the supplied AC power adaptor. Do not use any other AC power adaptor to avoid damaging the speaker.

**Battery installation (See fig. 1B)**  
**Battery replacement**  
When the batteries are weak, the POWER/CHARGE indicator will start flickering and become faint, or the playback sound will become distorted or unstable. In such a case, replace all the batteries with new ones.

## Playing back sound of the connected device

(See fig. 1B)

Adjust VOLUME to minimum to avoid any sudden loud sounds that may hurt your ears and set the volume of the connected device to a moderate level.

- Disconnect the USB cable used for the speaker and personal computer, or set the POWER switch of the connected personal computer to OFF.  
When a USB cable is connected between the speaker and a personal computer, no sound will be heard from a Walkman set on the multiple connector, as data transfer mode takes place. Sound from the device connected to INPUT will be heard instead.
- Set the POWER switch to ON.  
The POWER/CHARGE indicator lights up.
- Play back the connected device.  
Adjust VOLUME accordingly.  
When both a Walkman set on the multiple connector and a device connected to INPUT are used, both sounds can be heard. Control on/off on the connected device itself.
- Set the POWER switch to OFF after using.  
The POWER/CHARGE indicator goes off.

**Notes**  
If connecting the speaker to a device with built-in a radio or tuner, radio reception may not occur or sensitivity may be reduced.  
The USB cable function of the connected Walkman, etc., to avoid isolation.  
The USB cable connecting the speaker with personal computer, use of transferring Walkman's data and recharging. When playing back audio of a personal computer using the speaker, connect through the INPUT.  
If the connected device's headphone output has a live signal, better sound will be heard if it is set to on. See the operating instructions of the connected device.

**Recharging**  
A Walkman set on the multiple connector can be recharged by either the AC power adaptor (supplied), or by using a USB cable (supplied with the Walkman) connected to a computer.

**Notes**  
Use the Operation Guide of the Walkman for details on recharging and related setting.  
When the POWER switch is set to OFF, the POWER/CHARGE indicator lights up red while recharging. When the LIGHT switch is set to ON, the bottom of the Walkman will be illuminated. After completing recharging, the POWER/CHARGE indicator and the illumination go off.  
Data transfer and recharging cannot be performed simultaneously.  
Playback and recharging can be done at the same time. Recharging time will be longer during playback.  
Change the power source from the use of the AC power adaptor or USB cable. For details, see the Operation Guide of the Walkman.

**Using the speaker's illumination**  
Set the LIGHT switch to ON.  
While recharging, the Walkman or when the POWER switch is set to ON, the bottom of the speaker is illuminated.  
At higher volumes, illumination may flicker. This is not a malfunction, but should it bother you, you may turn off the illumination.
